

Statistical Support

Statisticians work on a fee-for-service basis and are available through the UBC Department of Statistics or various research institutes (see below). **Some Faculty of Medicine Departments and Divisions have staff members who can provide statistical support**, so please check with your Activity Supervisor's Division or Department.

Organization	Support offered
UBC Department of Statistics https://www.stat.ubc.ca/need-help-your-data	Applied Statistics and Data Science Group: Fee based. This is the main source of statistical support offered by the UBC Dept of Statistics.
	Statistical Opportunity for Students (SOS) program: First hour free, if you are working with a graduate student (program funded by the UBC VP Research Office).
	STAT 551: Free. Statistics graduate students taking this consulting practicum course offer free statistical advice. The course is offered in the fall semester of every academic year (September through December). Email ASDA staff re: contributing a project to 551
VCH Centre for Clinical Epidemiology and Evaluation (C2E2)	http://c2e2.ca/resources/consultation Free one-hour consultations are available to VCH staff through scheduled appointments. Consultations are not provided for student or resident research projects unless the project is an integral part of a staff member's research program, otherwise individuals should seek assistance from their department.
UBC Centre for Advancing Outcomes	Research Services Centre for Advancing Health Outcomes (ubc.ca) Initial consult free. Based at St Paul's Hospital in Vancouver.
UNBC Academic Success Centre	https://www.unbc.ca/academic-success-centre/statistics-support Academic Success Centre provides statistics support for graduate students who need to develop their statistical skills, and may be able to assist with basic descriptive and inferential statistics. Medical students working with a graduate student could use this resource.
Research Informatics/Statistics with the Vancouver Island Health Authority	If your PI is affiliated with the Island Health Authority, you may also contact Victor Espinosa (Victor.Espinosa@viha.ca), Manager, Research Informatics/Statistics with the Vancouver Island Health Authority.
Southern Medical Program students only	The Centre for Scholarly Communication at the UBC Okanagan library offers research data consultation. See https://csc.ok.ubc.ca/consultations/research-data-consultation/ for more details.

Organization	Support offered
Harvard Course on Statistics and R programming	Free course. See https://pl.harvard.edu/course/statistics-and-r
